

Walt Disney World Resort Will Open Completely Reimagined Disney's Coronado Springs Resort in 2019

New 15-story tower, two new restaurants are just some of the dramatic changes that will expand and enhance the popular resort hotel

LAKE BUENA VISTA, Fla. (Oct. 16, 2018) – In summer 2019, Walt Disney World Resort will unveil a completely reimagined Disney's Coronado Springs Resort, featuring hundreds of new guestrooms and a plethora of new amenities. Walt Disney Imagineering is reinvigorating the resort with fresh storytelling and functional enhancements that will make a dramatic impact on the experience for guests.

The biggest addition to the property will be a 15-story tower offering a two-level entrance lobby, 545 guest rooms (including 50 suites), a themed and unique rooftop table-service restaurant, two presidential suites and more.

A second new restaurant will be located on an island in the middle of the resort's 14-acre lake, Lago Dorado. New walkways will stretch across the lake, allowing quick and convenient passage to and from all areas of the resort.

All 1,800-plus existing rooms at Disney's Coronado Springs Resort feature updated fixtures, furnishings and lighting. A fresh, sophisticated color palette will tie the entire resort together when the tower opens, with a total room count of more than 2,400.
